

# Matilde Dolfato

matilde (dot) dolfato (at) studbocconi.it | [github.com/matildedol](https://github.com/matildedol) | [linkedin.com/in/matilde-dolfato](https://linkedin.com/in/matilde-dolfato)

## EDUCATION

### Bocconi University, Milan, Italy

M.Sc. Artificial Intelligence

Sep 2024–Present

· Courses: Linear Algebra, Algorithms for Opt and Inference, Software Eng,  
Deep and Reinforcement Learning, NLP, Computer Vision, Information Theory

B.Sc. Economic and Social Sciences

2021–2024

· Advised by Prof. Jérôme Adda

· Final work: *Can Machine Learning Aid Econometrics?*

### Universitat Pompeu Fabra, Barcelona, Spain

Exchange Program

2024

### Università degli Studi di Milano Statale

B.Sc. Biotechnology, Single Courses

2022–2023

## EXPERIENCE

### Research fellow

Nov 2025–Present

NOVA Information Management School, Lisbon

· Supervisor: Prof. Mauro Castelli

· Research area: explaining *double descent* phenomenon, what underlies  
stochastic gradient descent preference for smoothness, what is smoothness

### Visiting Student

Apr 2025–Nov 2025

Bocconi Institute for Data Science and Analytics (BIDSA)

· Mentor: Prof. Elia Brué

· Research area: Ricci curvature bounds for discrete spaces, optimal transport,  
convergence of diffusion processes and functional inequalities in spectral theory

· *Technical notes* and two presentations (1,2)

Founding and Board Member, Co-Head Pure Math Division

Sep 2025–Present

Bocconi Student Association for Mathematical Sciences

· Gave a *lecture on optimal transport* Reading Seminars Information Geometry (*Technical notes*)  
Spring 2025

Research Internship Algebraic Topology

Spring 2025

Department of Decision Sciences, Bocconi

Research Assistant

Jun 2023–Dec 2023

Innocenzo Gasparini Institute for Economic Research, Bocconi

· Mentor: Prof. Massimo Marinacci

· Research area: re-interpretation and adaptation of the first quantitative analysis  
in social sciences by Cesare Beccaria (with tools of probability and decision theory)

## SELECTED PROJECTS

*saLM-1: Self-Aware Language Model Ensemble* (LLM ensemble architecture)

*Adversarial Robustness Pipeline* (CNN adversarial training)

*Wordle Guesser* (Entropy-based guesser)

*Movie Recommendation System* (Web app)

## SKILLS

Programming: Python (proficient), R, STATA (advanced), C, C++ (beginner)

Languages: Italian (native), English (proficient), Spanish (advanced)

## OTHER INTERESTS

Sailing, surfing, windsurfing; volleyball (ex-professional); mountain hiking and skiing; piano;  
theater and cinema
