

Matilde Dolfato

matilde (dot) dolfato (at) studbocconi.it | github.com/matildedol | linkedin.com/in/matilde-dolfato

EDUCATION

Bocconi University, Milan, Italy

M.Sc. Artificial Intelligence

Sep 2024–Present

- Courses: Linear Algebra, Algorithms for Opt and Inference, Deep Learning, Geometric Computer Vision, Information Theory, PDE, Complex Systems, Optimal Transport, Real and Fourier Analysis (audit)
- GPA: 29/30

B.Sc. Economic and Social Sciences

2021–2024

- Advisor: Prof. Jérôme Adda
- Final work: *Can Machine Learning Aid Econometrics?*, grade: 110/110 *cum laude*
- Final grade: 110/110 *cum laude*

Universitat Pompeu Fabra, Barcelona, Spain

Exchange Program

2024

Università degli Studi di Milano Statale

B.Sc. Biotechnology, Single Courses

2022–2023

EXPERIENCE

Lean Seminar organizer

Mar 2026–Present

Department of Decision Sciences, Bocconi

- Organizing and leading a *reading seminar* on the Lean proof assistant

Research fellow

Nov 2025–Dic 2025

NOVA Information Management School, Lisbon

- Supervisor: Prof. Mauro Castelli
- Research area: explaining *double descent* phenomenon, what underlies stochastic gradient descent preference for smoothness, what is smoothness

Visiting Student

Apr 2025–Nov 2025

Bocconi Institute for Data Science and Analytics (BIDSA)

- Mentor: Prof. Elia Brué
- Research area: Ricci curvature bounds for discrete spaces, optimal transport, convergence of diffusion processes and functional inequalities in spectral theory
- *Technical notes* and two presentations (1,2)

Founding and Board Member

Sep 2025–Present

Bocconi Student Association for Mathematical Sciences

- Gave a *lecture on optimal transport*

Reading Seminars Information Geometry (*Technical notes*)

Spring 2025

Research Internship Algebraic Topology

Spring 2025

Department of Decision Sciences, Bocconi

Research Assistant

Jun 2023–Dec 2023

Innocenzo Gasparini Institute for Economic Research, Bocconi

- Mentor: Prof. Massimo Marinacci
- Research area: re-interpretation and adaptation of the first quantitative analysis in social sciences by Cesare Beccaria (with tools of probability and decision theory)

SELECTED PROJECTS

saLM-1: Self-Aware Language Model Ensemble (LLM ensemble architecture)

Adversarial Robustness Pipeline (CNN adversarial training)

Wordle Guesser (Entropy-based guesser)

SKILLS

Programming: Lean, Python (proficient), R, STATA (advanced), C, C++ (beginner)

OTHER INTERESTS

Sailing, surfing, windsurfing; volleyball (ex-agonistica); mountain hiking and skiing; piano; theater and cinema
